Funding source: This study was funded by the Pediatric Hospital Medicine (PHM) Fellows Grant at Cincinnati Children's Hospital Medical Center (CCHMC). This work was completed in partial fulfillment of the Master of Science degree in Clinical and Translational Research in the Division of Epidemiology, University of Cincinnati College of Medicine, which is supported by an Institutional Clinical and Translational Science Award, NIH/NCATS 1UL1TR001425. This work utilized Research Electronic Data Capture (REDCap) database, which was made available through Center for Clinical and Translation Science and Training at University of Cincinnati supported by NIH/NCATS UL1TR000077. Ms. Vanessa Wagner's effort was funded by research stipend through the Medical Student Pediatric Scholars Program at University of Cincinnati College of Medicine. Dr. Joanna Thomson's effort contributing to this manuscript was in part funded by the Agency for Healthcare Research and Quality (Grant #K08 HS02513). Dr. Amanda Schondelmeyer's effort contributing to this manuscript was in part funded by the Agency for Healthcare Research and Quality (Grant# K08 HS026763).

Role of Funders: The content is solely the responsibility of the authors and does not necessarily represent the official views of the funding organizations. The funding organizations had no role in the design, preparation, review, or approval of this paper.

Financial Disclosure Statement: Dr. Joanna Thomson is supported by the Agency for Healthcare Research and Quality (Grant #K08 HS02513). Dr. Amanda Schondelmeyer is supported by the Agency for Healthcare Research and Quality (Grant# K08 HS026763). The content is solely the responsibility of the authors and does not necessarily represent the official views of the Agency for Healthcare Research and Quality.

Conflict of Interest Statement: The authors have no conflicts of interest to disclose.

Clinical Trial registry name and registration number: N/A

Abbreviations: Limited English Proficiency (LEP); English Proficiency (EP); Emergency Department (ED), Institutional Review Board (IRB); Cincinnati Children's Hospital Medical Center (CCHMC)

Contributors Statements:

Dr. Choe conceptualized and designed the study; recruited participants; led data collection, analysis, and interpretation; drafted the initial manuscript; reviewed and revised the manuscript; and approved the final manuscript as submitted.

Drs. Unaka, Thomson, and Schondelmeyer supervised the conceptualization and design of the study; supervised data collection, analysis, and interpretation; critically reviewed and revised the manuscript; and approved the final manuscript as submitted.

Ms. Mangeot contributed to the design of the study; conducted analysis and interpretation of data; critically reviewed and revised the manuscript; and approved the final manuscript as submitted

Mses. Wagner, Durling, Moeller, and Ampomah contributed to the design of the study and development of the data collection tool; participated in data collection, analysis, and interpretation; critically reviewed and revised the manuscript; and approved the final manuscript as submitted.

Acknowledgments: We wish to acknowledge nursing and Language Access Services Leadership at CCHMC including Brenda Demeritt, BSN, RN, MHA and Andy Schwieter for partnership critical for recruitment of participants.
